

Felt Owl Mobile Pattern

My First Baby

What You'll Need:

Felt in the colours of your choice, embroidery thread in matching colours, needle, sewing scissors, pins, toy filling, and novelty buttons (optional)

Directions:

1. Cut out all the pieces in the colour felt that you have selected. You will need two of everything that is marked (cut two) above. You can either fold the felt and cut both at the same time or individually if you are not as confident.
2. Using blanket stitch use your embroidery thread to sew the two owl body felt pieces together around the outside, inserting the wings in position as required. Remember to stop before getting right to the end to stuff the owl using the toy filling.
3. Continue to sew the remaining pieces in place, starting with the belly. Then sew the outside of the eye and the inside of the eye at the same time once again using blanket stitch. Pins will help to hold these in place.
4. Finish by sewing the pupils of the eyes, experiment by making the owl look in different directions by changing their position. If you prefer stitch some eyes to make the owl look asleep. Lastly sew the nose in place. Additional stitching such as "ZZZ" or "XOX" or "XXX" can be added to the belly area if preferred. Novelty buttons are a great way to make your owl an individual and give them personality.
