

NOTES ABOUT MAKING THE ELEMENTS IN THIS PRINTABLES PACK:

Print all pieces you require for your party in full colour, ensuring you “print to fit” so as to not cut off any of the designs.

Recommendations will be made for the **paper/cardstock type** and **adhesive type** for each printable included in this pack, however use what you feel will work best for your application. Ensure the adhesive you use is strong enough to hold and will not wrinkle or damage the printable.

When asked to **score** the cardstock: use a ruler and something with a dull, thin edge like a butter knife or letter opener. You want to put a crease in the card stock but not cut into it.

For some of the printables in this pack you will require additional items to complete them for use. This may include ribbons, strings, tooth picks, paddle pop sticks etc. Each set of instructions will give you more information on what you need.

PBC highly recommends the use of sharp scissors and/or a craft knife/steal ruler (where appropriate) to achieve the best results. Take your time when cutting and be as neat as possible to ensure a high quality completed party set. A paper guillotine or paper cutter can be helpful tools when cutting out large straight edges such as those found in the bunting banner, however are not necessary to complete this set. Be extremely careful when using any sharp tools to avoid personal injury.
