

# Reindeer Christmas Tree Decoration Pattern

Antlers  
(cut one)

Ears  
(cut two)

Reindeer  
Body  
(cut two)

## What You'll Need:

Felt in the colours of your choice for the body and ears, embroidery thread to match, red felt for the nose, white stiffened felt for the antlers, needle, sewing scissors, pins, toy filling, beads for eyes, ribbon to hang and decorate.

## Directions:

1. Cut out two reindeer body and ears in the colour felt that you have selected. Cut out one set of antlers using the white stiffened felt. You will need to cut a small circle of red felt for the reindeer's nose.

2. Using a small running stitch as close to the edge as possible, sew the two reindeer bodies together. Insert the ears and the antlers in the appropriate place, along with a looped piece of ribbon so you can hang your finished reindeer on the Christmas tree. (If you don't want to be able to hang your reindeer, don't add a ribbon).

Remember to stop before reaching the end so you can stuff the reindeer with toy filling. TIP: (Use the stuffing from an old pillow to save money).

Handy Hint: If you decide later that you really want to be able to hang your reindeer, you can simply sew the ribbon to the back and use a matching button on top of the ribbon to make it look neat, tidy and professional.

3. Decorate your reindeer by sewing the red nose in place, attaching beads for eyes and tie a ribbon with bow around the neck.

These reindeer make great handmade gifts or simply add some Christmas charm to your Christmas tree.
